

e-ISuite 1.1.1 Release Notes

Date: October 20, 2015
Version: e-ISuite Version 1.1.1

Description: The primary focus of this release is to address known issues and newly identified defects in release 1.1.0.

Additional information is also available on the e-ISuite Webpage: <http://eisuite.nwcg.gov>

Important Things to Know Prior to Installing e-ISuite Site 1.1.1 Full Release

- **YOU MUST UNINSTALL** all previous versions of e-ISuite Site.
Note: See detailed uninstall instructions on the following page
- System Requirements
 - Windows 7 Professional or Windows 2003/2008/2012 Server
Will install and run on Windows XP, but is not a supported operating system
 - No competing http Services (Tomcat6 will provide web services on server machine)
 - Must have Visual C++ 2010 Runtime Redistributable installed
- Browser Requirements
 - Internet Explorer 11 Officially Supported
 - Pop-up Blockers Turned Off
 - Latest Adobe Flash Installed
- System Administrative privileges **are** required to install the application.
Note: To install, download the file and right-click on the installer file and choose either Run as Administrator or Run Elevated (USFS).
- For more information Download the Site Installation and e-ISuite Site Setup Basics PowerPoints located on the Helpful Resources page.
<http://eisuite.nwcg.gov/new/helpfulresources.htm>
- See the Site e-ISuite Account Manager User Guide for additional information on establishing user accounts in Site and assigning roles and access to incidents.
<http://eisuite.nwcg.gov/Docs/UserGuides/AccountManager.pdf>
- An Online Tutorial for the Site Account Manager is also available on the e-ISuite Webpage under Online Tutorials.

e-ISuite Site Version 1.1.1 Installation Instructions When Previous Version is Installed

Step 1: Copy all the files in the NWCG-BACKUPS folder from C:\ProgramData\e-ISuite to another location such as a USB Drive or External Hard Drive. By default, e-ISuite backups are stored in the following directory: C:\ProgramData\e-ISuite\NWCG-Backups

Note: Users should copy everything in that directory to a different location (either an external hard drive, a USB drive, or another location on their machine)

Step 2: Uninstall their current version of e-ISuite. The safest way to uninstall e-ISuite is to use the e-ISuite uninstaller in the start menu under Start Menu > All Programs > e-ISuite. Users must run that uninstaller by right-clicking on Uninstall e-ISuite Site and picking either Run Elevated (USFS Users) or Run As Administrator (all other users).

Step 3: Users will be required to reboot their systems after they uninstall e-ISuite.

Steps 4 is Recommended, but not Required

Step 4: After the system reboots, users need to delete the e-ISuite folder from C:\ProgramData Note that elevated privileges are required to delete items from C:\ProgramData - either Run Elevated Privileges for USFS Users or Administrator Privileges for other users.

Note: The C:\ProgramData folder may not be visible if users have their folder settings set to not show hidden files and folders. If it is not visible, users can temporarily change their Folder Settings to show hidden files and folders under the Control Panel > Appearance and Personalization > Folder Options)

Step 5: After deleting the e-ISuite folder from C:\ProgramData, users may proceed with the installation of e-ISuite Site 1.1.1.

Release 1.1.1 Summary

| Defect ID | Functional Area | Summary |
|--------------|-----------------|---|
| 4944 | Cost Accruals | Accruals will calculate correctly when adding an incident to an incident group. |
| 4875 | Cost Daily | Default Accounting Code will now display when adding a new Other Cost. |
| 4960 | Cost Daily | Cost records will correctly generate after the release date or incident end date is removed. |
| 4450 | Cost Daily | Daily Costs are now calculated using the correct Cost Rates. |
| 4990 5019 | Cost Daily | Use Actuals Only option is now functioning correctly. |
| 5007 | Cost Daily | Cost records will no longer generate after the release date for resources with a status of "R" Reassigned. |
| 4954 | Cost Groups | When a percentage of 100 is used in a Cost Group the Cost Share Reports now display 100 % instead of 10 %. |
| 5006 | Cost Reports | The Category Summary Report by Incident and the Totals in Graph will now show correct matching totals. |
| 4902 | Cost Reports | Cost Share Summary Report now combines shifts correctly. |
| 4980 | Custom Reports | A Critical Error will no longer display when using the "Not Starts With" option in Custom Reports. |
| 5018 | Custom Reports | The Estimated Date of Arrival will now display correctly in the Demob Grid and will Render in Custom Reports. |
| 5010 | Custom Reports | Custom Reports with a "/" in the title will correctly export. |

| | | |
|------|------------------|---|
| 5009 | Custom Reports | When building a criteria statement for Air Travel Method A/R, users may now enter "AR" or "A/R" in the criteria statement and get the proper results. |
| 4800 | Data Transfer | Accrual Data is now included in a Data Transfer file. |
| 5024 | Data Transfer | Large Databases no longer give a CRITICAL error when creating Data Transfer Files in Site. <i>Note: Some files may take several hours to transfer.</i> |
| 4993 | Demob | A Check-in date is no longer required when demobing Resources. |
| 5145 | Demob | The User Interface no longer locks up if users enter very lengthy Special Instructions in the Air Travel Special Instructions field. |
| 4997 | Demob | Tentative and Actual Demob Remarks can now be removed from a Resource Record. |
| 4992 | Demob Reports | Days Left will now render correctly on the Demob Planning Report. |
| 5107 | Financial Export | Financial Exports no longer report a null error when exporting file. The user now receives a message stating which resource has an issue. The user will need to resolve the issue prior to completing the financial export. |
| 4988 | IAP | The time of "2400" will now save when Creating or Editing a Plan. |
| 5090 | IAP | Multiple copies of External Attachments will no longer occur when Copying a Plan. |
| 4982 | IAP | The system will notify the user that no more than 8 frequencies can added to Block 8 on the ICS-204. |
| 5029 | IAP | On the ICS 205, 1 line of Remarks will no longer generate/display on a second page. |
| 5091 | IAP | IAP 204 Block 5 Reorder Resource option is no longer losing focus. |

| | | |
|--------------|-----------------------|--|
| 5025 | Manage Site Databases | <p>Creating Additional Databases will no longer generate a Critical Error.</p> <p><i>Note: This still may randomly occur. However, the user can now remove the corrupt database.</i></p> |
| 5144 | Manage Site Databases | The system no longer freezes due to Tomcat6 Starting/Stopping while a backup is in progress. |
| 4998 | Manage Site Databases | Restore Database option will no longer generate a Critical Error if Account Manager restoring the database is also in the database being restored. |
| 4462 | Manage Site Databases | The Auto Backup process will correctly create backups at the specified frequency. |
| 5089 4725 | Manage Site Databases | The Auto Backup process correctly includes invoices in the backup file. |
| 5000 | Message Board | The Entered By and Date Entered are correctly displaying in the Urgent Message Grid. |
| 4991 | Message Board | Saving changes to the message board in Site no longer results in a Critical Error Message. |
| 5039 | Reference Data | A User added Non-standard Unit ID will no longer display twice in the Unit ID dropdown list on the Add/Edit Resource screen. |
| 5030 | Reference Data | The 209 Code can now be removed from a Non-standard Item Code. |
| 5038 | Resources | Different users no longer see different values for First Work Day when viewing the same resource at the same time. |
| 5056 | Resources | The Cancel button in the Roster Resource pop up window only clears the fields; it does not close the window. Users must close the window by clicking on the "X" in the upper right corner. |
| 5108 | Resources Reports | All Resources Report correctly displays the Demob Date in the Demob Date column. |
| 5100 | ROSS Import | The ability to Import from previous exclusions during the ROSS import process is now functioning correctly. |

| | | |
|--------------|---------------|---|
| 5126 | Time | Time Adjustments will now display the correct date regardless of the computer's time zone. |
| 5004 | Time | An OF-286 posting using a UOM of Each will now accept a value >10000. |
| 5082 5142 | Time | OF 286 Rates with a description that is longer than the 8 characters will no longer lock up the system when selected. |
| 5047 | Time | OF-288 Time Postings are no longer displaying out of order on Post Time Grid. |
| 4987 | Time | OF-286, Block 10 and 11 are now checked correctly based on user selection. |
| 5002 | Time | User will no longer receive a validation message that a posting is missing a Stop Time after Checking the "Post Stop Time Only" checkbox. |
| 5101 | Time | Posting Crew Time that spans midnight will now post correctly. |
| 5137 | Time | Agreement Start and End Date will now render correctly regardless of computer's time zone. |
| 4953 | Time | Time Postings following a Special of "Day Off, Guarantee or COP" will now display correctly in the Post Time Grid and render correctly on the OF-288. <i>Note: This issue may still appear in the Post Grid in rare circumstances. The post will be corrected when the Invoice Button is selected.</i> |
| 4786 | Time Reports | The Summary of Hours worked report correctly sorts by Date then by Request Number within each date. |
| 5027 | Time Reports | Query issues with the Time – Summary of Hours Worked report have been corrected. |
| 4972 | User Accounts | The Roles Filter for User Accounts now works in Enterprise. |
| 5046 | Resources | The Grid for Roster from Existing Resources no longer includes the Parent Resource in the tree from. <i>Note: This addresses the issue that would allow a user to roster the Parent record to its own child record.</i> |
